## DETAILED ACTION

### *Election/Restrictions*

Claims 1-9, 11-29 and 37 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on July 24, 2007. A correction to the restriction that no claim is generic, therefore only claims 30-32 and 34 are examined. Also, since claim 10 was cancelled it does not belong to the first listed species.

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 30-32 and 34 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 2, 3, 12 14, 23 and 25 of U.S. Patent No. 6,636,350. Although the conflicting claims are not identical, they are not patentably distinct from each other because the microlithographic reduction projection catadioptric objective of U.S. Patent No. 6,636,350 has a first optical group, a second optical group and a folded off-axis field geometry. Claims 2, 3, 12, 14, 23 and 25 of U.S. Patent No. 6,636,350 do not specifically call for a numerical aperture of at least 0.8 or a blank mass of less than 57 kg at a 22 mm x 6 mm field operating at a numerical aperture of at least substantially 0.85. However, claim 3 of U.S. Patent No. 6,636,350 states that 4 mirrors and more than 8 lenses produce an image with a numerical aperture of at least 0.65. Therefore, it would have been obvious to one of ordinary skill in the art to provide a numerical aperture of at least 0.8 or a blank mass of less than 57 kg at a 22 mm x 6 mm field operating at a numerical aperture of at least substantially 0.85, since there are less lenses and mirrors that would provide the predictable result of a higher numerical aperture.
